

Dear Chief,

We all know of the high risk of cancer in the fire service. I am writing you on behalf of the Fire Rescue Wellness Corporation to present a new product that I believe will offer you substantial protection from benzene, aldehydes, hydrocarbons and other carcinogens you are exposed to on the job. As you know, these elements have been linked to firefighter cancer and unfortunately, the rates are growing.

EF Recovery has worked hand in hand with the Washington Fire Chiefs and the Fire Rescue Wellness Corporation to create this new product: Benz-Out. Many of you learned about it at the Washington Fire Chiefs Expo show in May. It is to be used on turnout gear after exposure to hazardous residues. Any surface that is exposed to these carcinogens should also be treated: truck seats, trucks, helmets, etc. When you don't treat these items, they continue to emit carcinogens, exposing you and those around you to these cancer causing chemicals.

I know this is not a pleasant subject but it is very important for us to address this threat to our health.

Please take a look at the enclosed flier. Let's take appropriate action to reduce the cancer potential in our firefighters.

For questions, feel free to contact myself, or Jim Clark ([jclark@efrecovery.com](mailto:jclark@efrecovery.com) , 877-213-9047 x 332) and Vin Johnsen ([vjohnsen@efrecovery.com](mailto:vjohnsen@efrecovery.com) , 877-213-9047 x 302) from EF Recovery. Orders may be mailed in (see attached order form) or placed online at [sales@efrecovery.com](mailto:sales@efrecovery.com).

Sincerely,

A handwritten signature in black ink that reads "Wayne Senter".

Wayne Senter  
Executive Director  
Washington Fire Chiefs
